

Step 1: Place swaddle in car seat and pull harnesses through open slits.

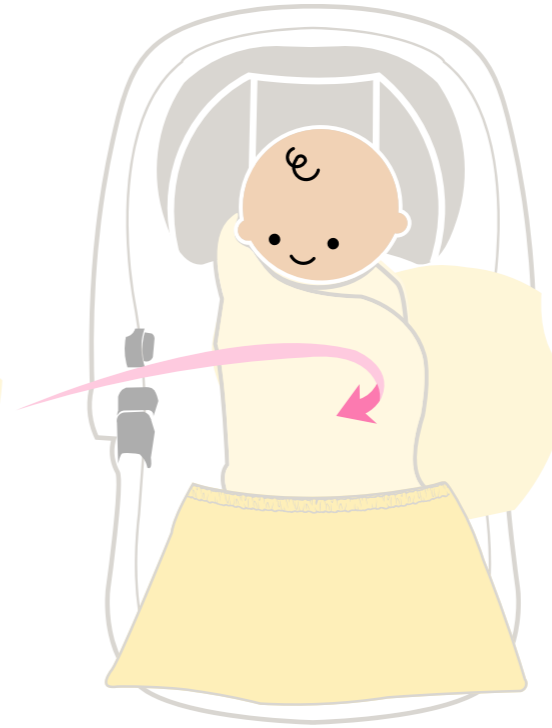

Step 2: Lay baby in car seat on the swaddle and secure the 5 point harness.

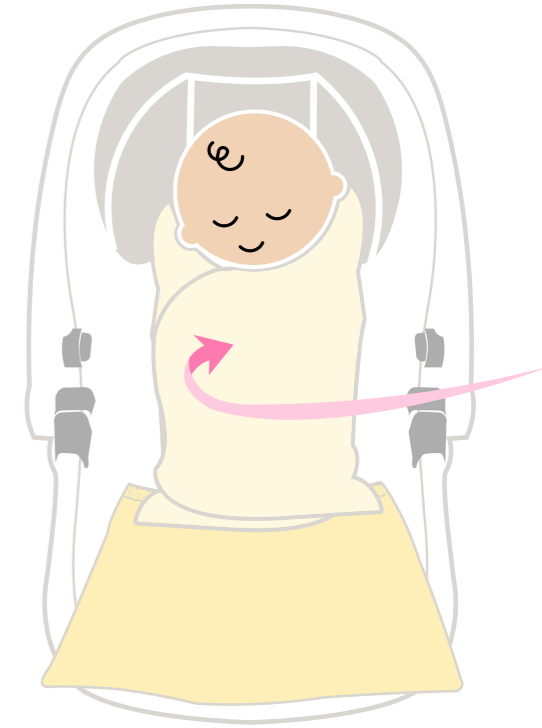

Step 3: Place baby's feet in the foot pocket and pull the end of the blanket out of the pocket and place blanket securely over baby.

****NOTE:** Some babies' feet may not reach the foot pocket yet. This is okay; it will be there for them as they grow.

Step 4: Take left wing and hug it tightly across baby's body; you may tuck under right side of baby's body to help secure.

Step 5: Pull tab off of Velcro on right wing so Velcro piece is exposed, then take right wing and hug it tightly across baby's body securing Velcro on half moon so that the baby is snug and secure!

****NOTE:** The car seat swaddle comes with two Velcro tabs which can be used to secure the wings to the car seat when the swaddle is not in use. While the baby is lying in the car seat swaddle, take the two Velcro tabs supplied and stick one on each side of the inside outer lip of the sides of the car seat where the wings naturally fall in order to secure proper placement of tabs.

****WARNING!!! NEVER SWADDLE BABY WITHOUT FIRST SECURING THE HARNESS AROUND THE BABY. THE SWADDLE DOES NOT SECURE THE BABY IN THE CARSEAT****
